

# ARCODA WF Tracker

The simplest solution for real-time tracking of workforce on the field.

[www.arcoda.it](http://www.arcoda.it)

# With Arcoda WF Tracker and a common smartphone, the tracking of workforce on the field is now even more simple and practical!

When **managing work activities on the field, tracking – even in real time – of the work performed by each operator/vehicle** is precious in terms of the reporting of the work actually done and of the benefit of having a continuously **updated picture of the work progress status**. Arcoda WF Tracker is the **simplest and most practical solution** to these needs, also because it exploits one of the most popular and widespread tools in the world: the smartphone.

Real time tracking of workforce activities thanks to an app installed on a common Android smartphone.

Immediately operational personnel. Immediate learning also because of the familiarity they have with smartphones.

Ideal also for tracking the activity of third party and interim personnel, who can use their own smartphone.

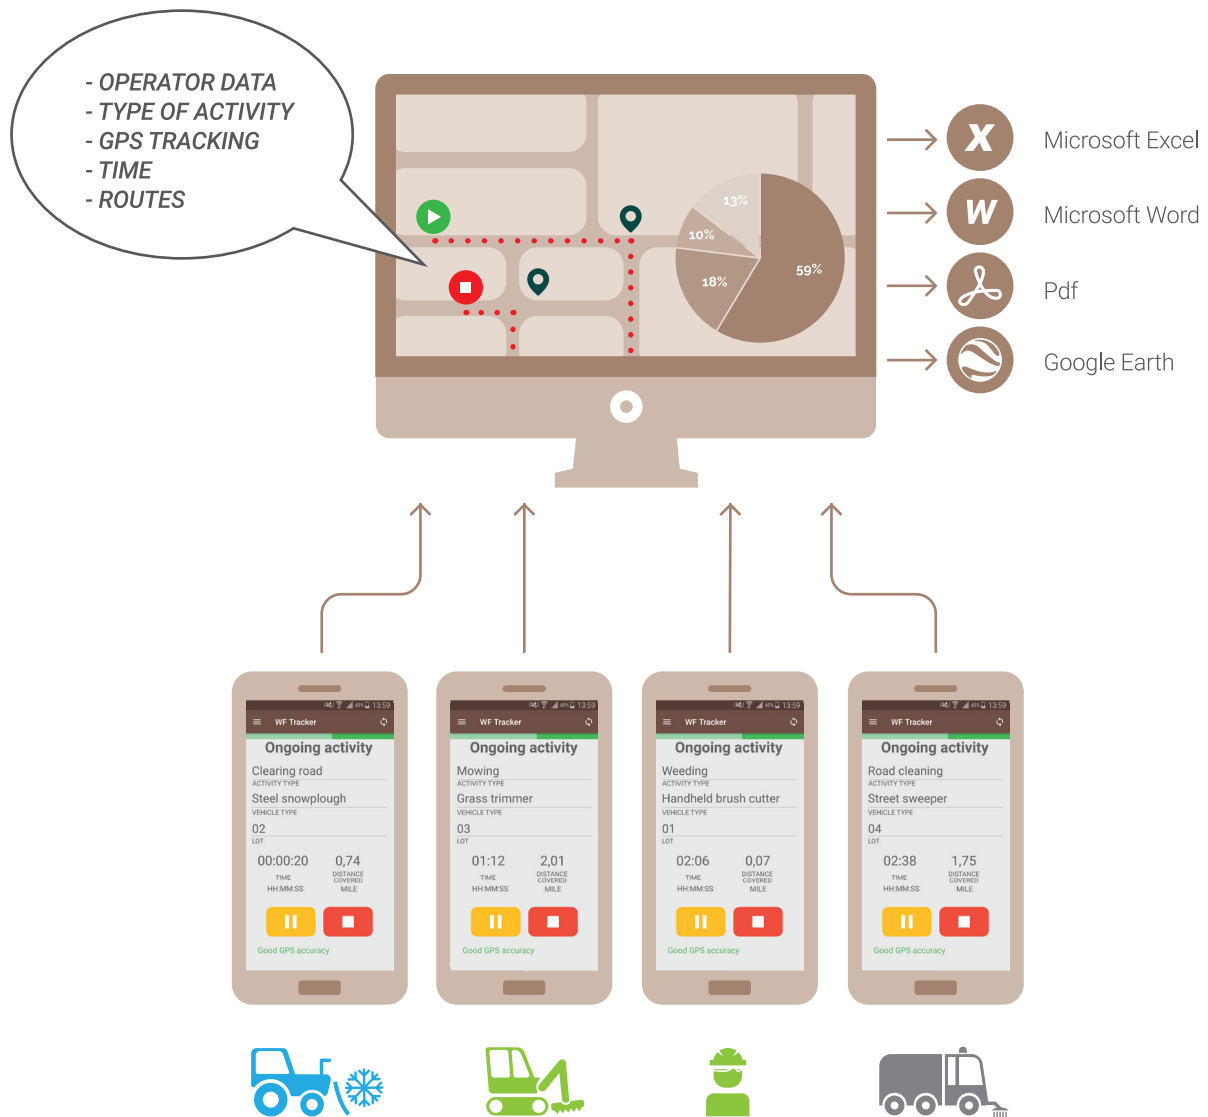

*With WF Tracker, monitoring the progress in work activities has never been simpler!*

- MAP OF ROUTES IN THE SYSTEMATIC DETECTION OF GAS LEAKS
- INSPECTION AND MONITORING OF ROAD NETWORK INFRASTRUCTURE
- SNOW REMOVAL AND SALT DISTRIBUTION ON ROADS
- INSPECTION OF POWER / GAS / WATER SYSTEMS AND GUTTERS
- URBAN WASTE REMOVAL ACTIVITIES
- THIRD PARTY WORKER ACTIVITY MONITORING
- GRASS CUTTING AND CANAL MAINTENANCE

# Web portal and Android app

The Arcoda Web portal allows to consult the real time and **historical data of all the activities tracked by the smartphones equipped with the Arcoda WF Tracker app**. The collected data are then **displayed in map, graph and table format**. The **data can be exported** in many ways, allowing the use of third party software in analysing the information and for reporting (Microsoft Excel, for example).

What must the operator do on the Arcoda WF Tracker app? Nothing could be simpler!

1 ✓

Select from a list the activity to be performed

2

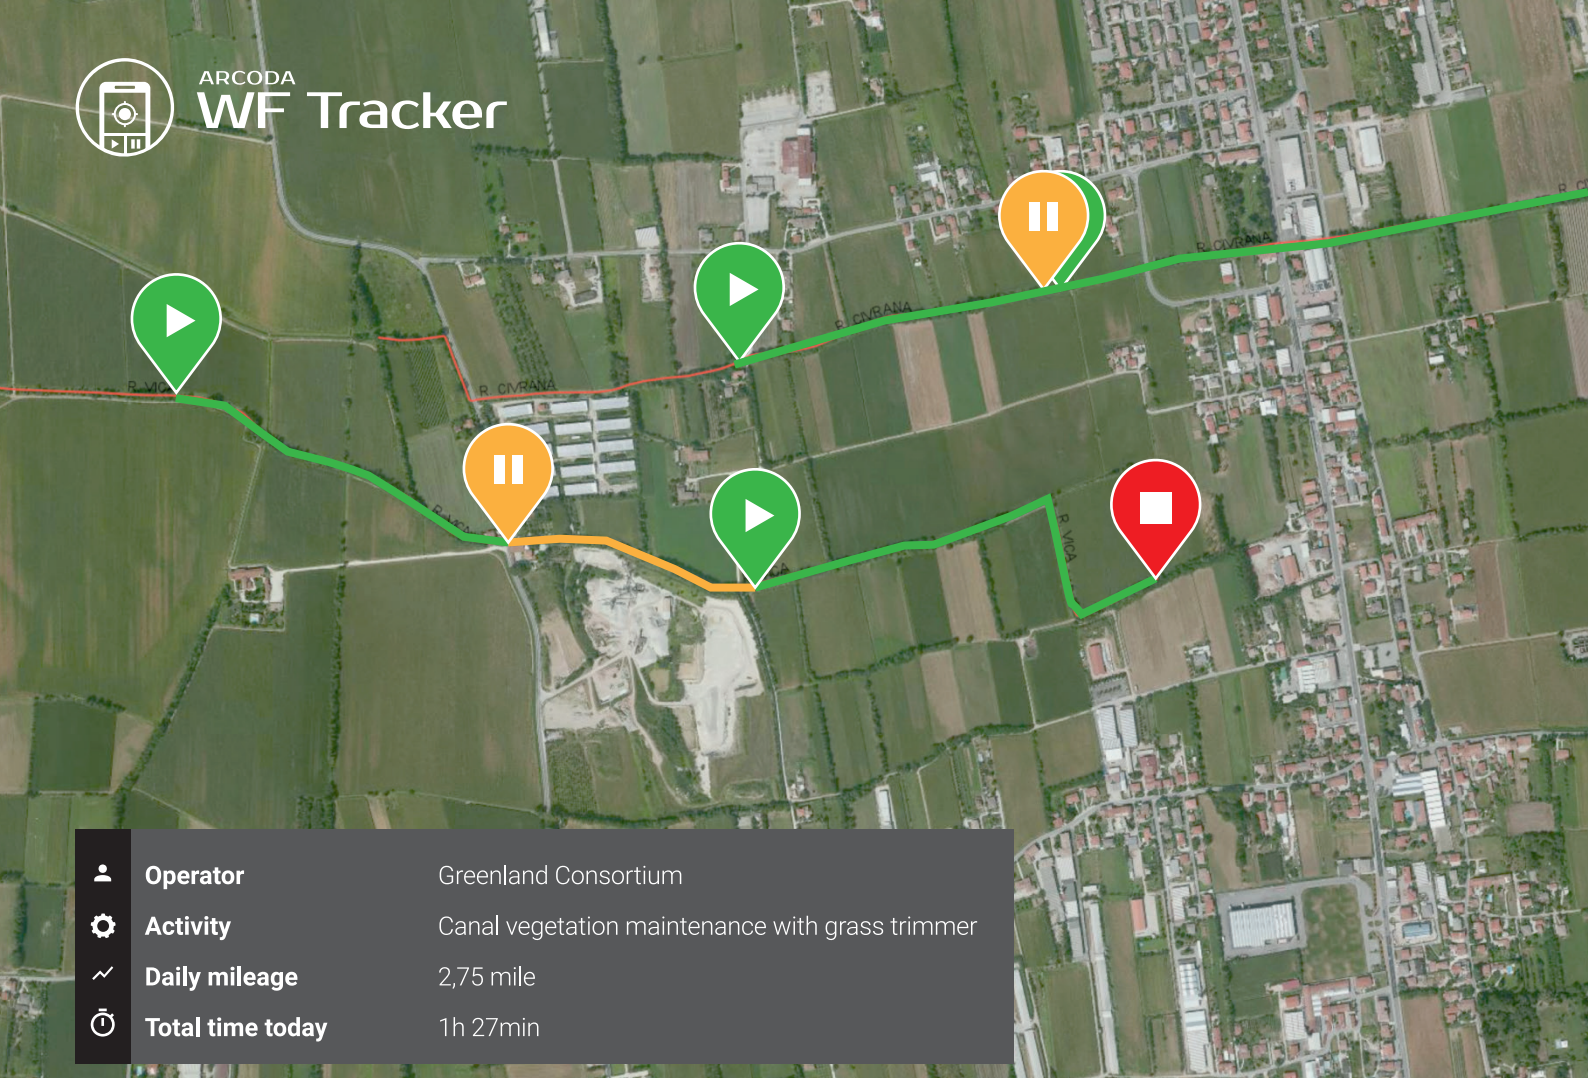

Press START ACTIVITY to start the tracking

3

Press PAUSE ACTIVITY and START ACTIVITY when taking a break

4

Press END ACTIVITY to terminate the work session

	<b>Operator</b>	Greenland Consortium
	<b>Activity</b>	Canal vegetation maintenance with grass trimmer
	<b>Daily mileage</b>	2,75 mile
	<b>Total time today</b>	1h 27min
